

## Lab 00 Report

1. Homeworks – 60%
  - Laboratory Assignments – 10%
  - Laboratory Reports – 10%
  - Final – 20%
  - Grades
    - A [90 – 100]
    - B+ [85 – 90)
    - B [80 – 85)
    - C+ [75 – 80)
    - C [70 – 75)
    - D+ [65 – 70)
    - D [60 – 65)
    - F [0 – 60)
2. Blackboard
3. All deadlines are strict. No late submissions will be accepted
4. There is no make up work, all late submission receive no credit.
5. Regrade requests may only be made within ONE WEEK after the assignment has been graded. These requests must be done electronically via email to the instructor. Regrade requests only apply to previously submitted work and we do not accept additional work after the fact. Multiple, frivolous regrade requests will disqualify future regrade requests. No work or regrade requests can be accepted after the last day of class.
6. True
7. Laboratory reports must be submitted as a PDF, e.g., lab00.pdf.

Homework assignments are larger programs to be written outside of class. They are to be sent in electronically before the indicated time on the day they are due, and they must be done individually.

Both Lab and Homework solution submissions must be made in an aptly named directory, e.g., lab00 or hw01, and compressed into a zip archive, e.g., lab00.zip or hw01.zip.
8. The “\n” character makes a jump to the next line on the screen. It’s used to insert a line break or start a new line in the output.

9. The parentheses are required around the final plus operation so that the addition operation is actually used. The parentheses tells the computer that the math operation of addition is being used, not just jamming two numbers together.
10. When you remove them, the math operation is not applied. For example, when the integer "12" is inputted, the output is "1212". It simply combines the numbers instead of using the arithmetic operation.
